

Séché Group, a world of solutions

Radioactive Environment Services

Séché Éco-Services: Combining safety, performance and competitiveness

Through its Séché Éco-Services subsidiary, Séché Environnement, a major player in waste management, is developing tailored solutions adapted to the needs of nuclear and industrial professionals.

- Nuclear ■ Energy ■ Chemistry
- Oil and gas ■ Defense
- Health ■ Transport

Our multi-certified expertise (ISO 9001, ISO 14001, OHSAS 18001, CEFRI-E, CEA, EDF, UTO, Confidential Defense) guarantees high-quality services that combine safety, improved performance and competitiveness.

A comprehensive range of solutions

- Radioactive waste and hazardous waste management
- Radiation protection
- Nuclear safety studies
- Specialised equipment
 - ISO IP2 & type A transport containers
 - Radiation Shielding

Radioactive waste and hazardous waste management

- Radioactive waste recovery and conditioning (very low-level, low-level and intermediate-level waste)
- Asbestos removal
- Transport to storage units
- Studies of sectors and approvals
- Design and operation of processes and facilities for radioactive waste management
- Elaboration of intervention scenarios

Radiological mapping and remediation of facilities

- Radiological characterisation
- Mechanisation and automation of operations in a constraining environment
- Site and soil decontamination (chemical, biological, radiological risks)
- Radiation protection on work sites

Nuclear safety studies

- **New sites**
 - Development of reference frames
 - Application for authorisation
 - Application follow-up
- **Operations**
 - Periodic review
 - Reference frames update
 - Assistance with operational safety
- **Dismantling**
 - Safety analysis of dismantling operations
 - Development of dismantling files
 - Preparation of work permit application files

Radiation protection consultancy and radiation shielding equipment design

- Radiation protection studies
- Study, manufacturing and installation of permanent and temporary radiation shielding equipment appropriate for all kinds of radiation
- Decontamination and replacement of lead wool blanket
- Design and operation of control and measurement systems for radiation protection

Containers supply

ISO IP2 & type A containers (10, 20, and 40 feet)

Certified by the French Nuclear Safety Authority

Design and construction of mobile units

A team at your service

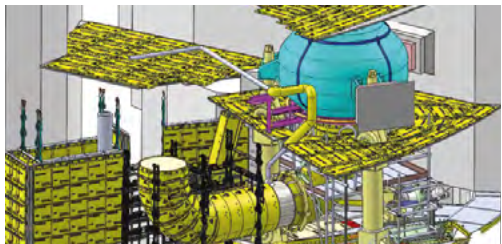

- Experts in nuclear and complex waste
- Employees trained to respond in controlled areas
- Experts in nuclear safety and regulations
- Turnkey project management

Operational assistance

- Radiation protection
- Decommissioning
- Flexible containment and thermal-wrapping solutions for nuclear areas
- Waste management
- Dismantling

High-performance technology

3D modeling

Radiation protection calculation

Management of software used for calculating earthquake resistance and materials resistance

A global player for environmental management

-  Offices / treatment sites
-  Ongoing or completed contracts

Our teams are at your service
