# Séché Group, a world of solutions

## Nuclear expertise serving industrial clients

### Séché Énergies: combining safety, performance and competitiveness

Séché Environnement, through its subsidiary Séché Énergies, is developing a national and international range of tailored solutions adapted to the nuclear professional's needs.

- Nuclear ■ Energy ■ Chemicals
- Oil and gas ■ Aerospace ■ Defense
- Health ■ Transport

Our expertise and certifications (ISO 9001, ISO 14001, OHSAS 18001, CEFRI-E, CEA, AREVA, EDF UTO, Confidential Defense), guarantees high-quality services that combine safety, improved performance and competitiveness.

### A comprehensive range of services

- Radioactive waste recovery and treatment
- Design and operation of waste management facilities
- Decommissioning and dismantling
- Nuclear engineering
- Industrial logistics
- Radiation protection consultancy and conception of bio-shielding equipment
- Containers supply

# Radioactive waste management

- Treatment of very low- to intermediate-level radioactive waste
- Flexible solutions based on your specific waste needs: volume reduction, decontamination, thermal treatment, stabilization, storage
- Design and operation of waste management facilities
- Safety, traceability and reduction of your environmental footprint

## Decommissioning and dismantling of nuclear facilities

- Safety studies, intervention scenarios and methods
- Design and qualification of specific equipments for nuclear operations
- Proven technologies for radiation protection
- Safe and environmentally optimized branches for transport, treatment, decommissioning and processing

## Nuclear engineering

- Feasibility study of your project conducted by our engineering department, made up of multidisciplinary experts specializing in nuclear sites
- Regulation studies and risk analysis
- Equipment development in compliance with the standard regulations
- Study and set-up of workstations and production lines
- Complete modeling of facilities

## Radiation protection consultancy and bio-shielding equipment design

- Studies, manufacturing and installation of permanent and temporary bio-shielding equipment appropriate for all kinds of radiation
- Maintenance, decontamination, compliance and replacement
- Personnel training

## Containers supply

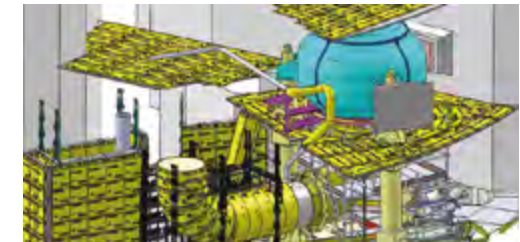

- 10-, 20- or 40-foot ISO Type IP2/A/Aerial containers
- Certified by the French Nuclear Safety Authority
- The sole supplier in France

## Industrial logistics

- Radiation protection consultancy
- Decontamination of equipment and tools
- Implementation of airlocks for nuclear containment
- Operational logistics

## High-performance technology

- Rapid, precise modeling through 3D scanning
- Ferros scanning
- Management of all software involved in calculating radiation protection, seismic resistance, and material resistance

## Séché's expertise

- Experts in nuclear issues
- Employees trained to respond in controlled areas
- Experts in nuclear safety and regulations
- Proximity and reactivity

## Séché Énergies, your partner in eco-responsibility

- Environmental monitoring
- Environmentally innovative technologies
- Certified in climate and Biodiversity Commitment
