

Séché Environnement once again recognised for its extra-financial performance

Séché Environnement, an international player in the circular economy and environmental services, has been awarded a gold medal by <u>EthiFinance</u>, a reward which confirms the group's extra-financial performance.

After the <u>Sustainalytics</u> agency, which raised the Group's extra-financial rating last November, it is now the turn of the EthiFinance rating agency to recognise Séché Environnement's excellent extra-financial performance with a further increase in its rating.

The Group has been awarded a gold medal for its ESG (Environmental, Social and Governance) performance, with a score of 75 out of 100 in 2023, up thirteen points on the previous year.

EthiFinance's extra-financial rating subsidiary, EthiFinance ESG Ratings, evaluates companies on the basis of nearly 140 criteria divided into four categories: Environment, Social, Governance and Stakeholders. This assessment measures the transparency of information, the maturity of policies implemented and progress made in terms of sustainable development.

This improvement in Séché Environnement's extra-financial rating is combined with high rates of eligibility and alignment with the European green taxonomy: over the first half of 2023, 86% of the group's turnover is eligible and 67% is aligned, based on the six objectives set by the European Commission.

"Our extra-financial performance and the high degree of alignment of our activities with the European green taxonomy are proof of the sustainability of our business model. They underline our ability to support our customers, both industrial and local authorities, in meeting the challenges of the ecological transition," says Maxime Séché, CEO of Séché Environnement.

About Séché Environnement

Séché Environnement is a leading player in waste management, including the most complex and hazardous waste, and in environmental services, particularly in the event of an environmental emergency. Thanks to its expertise in creating

circular economies, decarbonization, and hazard management, the group has been contributing to the ecological transition of industries and territories and to the protection of living things for nearly 40 years. Séché Environnement, a French family-owned industrial group, deploys the cutting-edge technologies developed by its R&D department on the ground, in more than 120 sites in 15 countries, including some fifty industrial sites in France. With over 5,700 employees, including 2,500 in France, Séché Environnement generated revenue of nearly €900 million in 2022, 30% of which from its international operations. Séché Environnement has been listed on the Euronext Eurolist (Compartment B) since November 27, 1997. It is included in the CAC Mid&Small and EnterNext Tech 40 indexes.
