**PRESS RELEASE**

## **Triadis Villeneuve-les-Béziers site obtains MASE certification for the next three years**

Séché Environnement is proud to announce that the Triadis Villeneuve-les-Béziers facility, near Béziers (Hérault department), has been awarded MASE certification for the next three years. This certification guarantees the continuous improvement of safety, health and environmental (SHE) performance within the company. This label rewards more than four years' work by the site's field teams and management to guarantee the highest standards.

The Triadis Villeneuve-les-Béziers hazardous waste management platform is now MASE certified. Created by a group of companies at the end of the 1990s, MASE is an operational standard for companies and industries wishing to adopt the simplest and most effective improvement process.

The standard is based on five pillars, enabling companies to structure their commitments, improve employee skills and qualifications, streamline work organization, and enhance the efficiency of the management system with a view to continuous improvement.

### **Safety is a top priority**

After four years of work, ranging from diagnosis to planning and skills management, including operational implementation and assessment, the Triadis platform in Villeneuve-les-Béziers has created a series of measures to improve the safety of its 25 employees. For example, every daily operations meeting and every weekly interdepartmental meeting begins with a focus on safety. New hires and contractors are systematically welcomed with a focus on safety. Handling aids have also been introduced to improve workstation ergonomics and adapt certain work situations.

This in-depth work has led to the mastery of communication and monitoring tools, highlighting the site's culture of continuous improvement.

MASE certification can be awarded for one or three years; the site has been awarded the maximum certification of three years, a further proof of the rigorous work undertaken by the Triadis Villeneuve-les-Béziers teams.

All these measures reinforce Séché Environnement's commitment to workplace safety and employee well-being at its sites.

### **About Séché Environnement**

Séché Environnement is a leading player in waste management, including the most complex and hazardous waste, and in environmental services, particularly in the event of an environmental emergency. Thanks to its expertise in the creation of circular economy loops, decarbonization and hazard control, the Group has been contributing to the ecological transition of industries and territories, as well as to the protection of the living world, for nearly 40 years. A French family-owned industrial group, Séché Environnement deploys the cutting-edge technologies developed by its R&D department at the heart of territories in more than 120 locations in 15 countries,

including some fifty industrial sites in France. With over 6,000 employees, including over 2,500 in France, S  ch   Environnement generated revenue of  1,013.5 million in 2022, 26% of which from its international operations. S  ch   Environnement has been listed on the Euronext Eurolist (Compartment B) since November 27, 1997. It is included in the CAC Mid&Small, EnterNext Tech 40 and EnterNext PEA-PME 150 indices. ISIN: FR 0000039139 – Bloomberg: SCHP.FP – Reuters: CCHE.PA

#### **About Triadis**

Triadis supports producers throughout the entire hazardous waste management chain: supply of specially adapted, secure containers, collection, grouping of waste at the platform, and transfer to appropriate recovery or treatment sites.

The Villeneuve-les-B  ziers site, which has been established in the region for over 20 years, is a local waste management tool for the B  ziers area and, more broadly, for the south of France. The range of solutions on offer caters for all types of waste sources and types of waste, from small volumes brought to waste collection centers by local residents (phytosanitary products, batteries, home improvement products, etc.), to larger volumes produced by economic players. The site has 25 employees.
