

## **Séché Environnement in charge of the evacuation and treatment of residues from the fire at the Bolloré Logistics warehouse site in Grand-Couronne (Seine-Maritime)**

**Séché Urgences Interventions (SUI), a subsidiary of Séché Environnement specialising in emergency response, is involved in the management of residues from the fire at the Bolloré Logistics site in Grand-Couronne, Seine-Maritime. The fire, which occurred in January 2023, destroyed part of the warehouse where 12,000 lithium batteries were stored. From 3 to 12 March, SUI proceeded with the installation of the site, on an area of 6,000m<sup>2</sup>. It will continue over a period of 7 to 9 weeks depending on the technical constraints encountered during the treatment of the waste.**

Séché Urgences Interventions has deployed a team of 12 highly qualified people to secure the residues of the fire and has the means to guarantee the safety of the site's operations. All the waste will be taken care of and sent to treatment centres of Tredi, a subsidiary of Séché Environnement. The waste will be subjected to thermal treatment and energy recovery.

Thus, Séché Urgences Interventions uses its know-how and logistical capacities to guarantee optimal and safe waste management as part of this intervention, contributing both to the decontamination of the site and to the protection of the environment. This action is part of the company's overall response to industrial crisis situations, in particular the risks associated with hazardous materials such as lithium batteries.

### **About Séché Environnement**

Séché Environnement is a leading player in waste management, including the most complex and dangerous, and environmental services, particularly in the event of an environmental emergency. Thanks to its expertise in the creation of circular economy loops, decarbonization and hazard control, and its cutting-edge technologies developed by its R&D, Séché Environnement has been contributing for nearly 40 years to the ecological transition of industries and territories as well as to the protection of living things. A French family-owned industrial group, Séché Environnement supports its customers with its subsidiaries located in 9 strategic countries and more than 120 locations worldwide, including some fifty industrial sites in France. With some 7300 employees, including around 3000 in France, Séché Environnement generated €1110.4 million in revenue in 2024, of which around 32% was generated internationally.

Séché Environnement has been listed on the Eurolist of Euronext (compartment B) since 27 November 1997. The stock belongs to the CAC Mid&Small, EnterNext Tech 40 and EnterNext PEA-PME 150 indices. ISIN: FR 0000039139 – Bloomberg: SCHP. FP – Reuters: CCHE. PA
